Address: Alexandria, Egypt

Objective

An ambitious and passionate Computer Science student with a solid foundation in data analysis, network infrastructure, and cybersecurity. Certified in CCNA and Cybersecurity Fundamentals, with practical knowledge in securing digital environments and analyzing potential threats. Currently enhancing my skills in penetration testing and ethical hacking, driven by a genuine curiosity to explore system vulnerabilities and safeguard critical assets. My experience in both the banking and technology sectors has equipped me with a unique blend of precision, adaptability, and problem-solving abilities. I am seeking to join a dynamic team where I can contribute to impactful cybersecurity initiatives while continuing to grow professionally.

Education

- - Bachelor's Degree in Computer Science and Information Technology
  The Egyptian E-Learning University — (2022 – 2026)
  Grade: Very Good

- - Digital Egypt Pioneers Initiative (DEPI) – Cybersecurity Track (2025 – 2026)

Professional Experience

Trainee | Commercial International Bank (CIB)) (7/2023 – 9/2023)

- Gained hands-on experience in daily banking operations with a strong emphasis on data privacy and customer information protection.

- Supported workflow optimization to minimize human error and enhance the security of transaction processes.

- Developed communication and problem-solving skills within a secure, system-driven environment.

Trainee | Emirates NBD with EYouth (4/2023 – 6/2023)

- Focused on developing essential soft skills such as communication, teamwork, leadership, and problem solving.

- Participated in interactive workshops aimed at improving personal and professional effectiveness.

- Gained exposure to real-world scenarios that enhanced adaptability, time management, and emotional intelligence.

Trainee | Abu Dhabi Islamic Bank (ADIB) (2/2023 – 3/2023)

- Observed operations within a compliance-driven, security-conscious environment aligned with Islamic banking principles.

- Gained exposure to secure transaction handling, access controls, and internal data protection measures.

- Built foundational awareness of how financial institutions manage risk, system integrity, and network reliability.

Key Skills

Technical Skills:

- Proficient in Microsoft Office Suite (Word, PowerPoint: Excellent; Excel: Very Good).
- Cisco-certified in CCNA and Cybercops Associate.
- Data analysis and AI tools.

Soft Skills:

- Exceptional communication and collaboration abilities.
- Strong creative problem-solving and decision-making skills.
- High adaptability and quick learning capability.

Languages:

- Arabic: Native.
- English: Intermediate.

Certifications and Courses

LinkedIn Learning:

- Data Analytics
- Generative AI Applications
- Creative Problem-Solving Strategies
- Mental Resilience and Productivity Enhancement
- Social Media Strategy and Workplace Success

Cisco & NTI:

- CCNA Certification (4/11/2023 to 16/1/2024)
- Cybercops Associate Certification (7/2/2024 to 9/3/2024)

Projects

- SMS Detection Project – Built a machine learning model to classify SMS messages as spam or ham using Python, Scikit-learn, and NLP preprocessing techniques.

- Image Captioning Project – Developed a deep learning model that generates context-appropriate captions for uploaded images using CNNs and RNNs.
